In this assignment, we will create a slideshow (10 slides) of the 10 photos you have submitted for Assignment 16. Follow the Tutorial found on the website. Be sure to utilize the Rule of Thirds and/or the Principle of Unequal Spacing as you crop the photos. Just to refresh your memory, the Rule and the Principle include:

The Rule ofThirds:
- The horizon line (if there is any) is at 1/3.
- The image (earth) is not tilted.
- If there is a central subject, it is placed at one of the 1/3 intersections.
- There is nothing attractive at the center.

The Principle of Unequal Spacing:
- All elements are unequally distributed.
- There is no awkward alinement or direction of the elements
- There is nothing attractive at the center.
