In this assignment, we will explore Product Photography. Just like Food Photography, Product Photography is a popular genre, and there are some orthodox methods some of which we will explore in this assignment. Unlike food Photography which presents the food usullay with one image, with Product Photography, we try to present the product with several different images. In this assignment, I would like you to choose a pair of shoes, and try to take and assemble 5 photos.

The above photos are taken with a large white paper hang from a wall. You could try to create a similar setup, but having a simple background in and outside of home may be more effective in presenting the product.
